

The Electronic Service Shop is available for the repair, modification and mild construction of laboratory instruments. The shop is staffed by experienced technical personnel familiar with clinical and research laboratory systems. Most repairs can be performed in our shop. Repairs requiring specialized support are directed to qualified vendors.

The Machine shop is completely equipped to provide design assistance, fabrication and repair of research-oriented biomedical laboratory equipment and devices.

Vendor services may be obtained by calling Shared Equipment Services at 732-235-4455. Billing is done through internal IDT's, no purchase orders are required. If special documentation is needed to meet regulatory requirements, it can be provided if requested at the time service is arranged.

Services and Pricing

In-house charges for service are based on time and material. Time is \$65.00 an hour.
